

"We changed to Optilube sterile 5g sachet back in November 2010. The Clinicians like the small individual sachets. The gel has the right consistency and suits all our clinical needs. We are very happy with the product."

Michaela Fairst, Clinical Specialist, UK

"My husband has a urethral stricture which was the result of an operation he had as a child. He previously didn't use lubricant but found it difficult doing the procedure and kept getting water infections following. Since using OptiLube he finds it much easier and hasn't had one water infection since."

Jacqueline Jackson, Carer, Rotherham, UK

Training & Education

We also offer training and education to help clinicians and patients, this includes videos of how **OptiLube** can be used across various hospital departments.

You can find these videos at www.optimummedicalsupport.co.uk

optimummedical®

optiLube™

sterile lubricating jelly
water soluble for
general lubricating needs

Not all lubricating gels are the same. At **Optimum Medical** we have listened to clinicians – the people who use lubricating gels every day. Working in collaboration with them, and using that vital feedback offer **OptiLube** - an FDA approved sterile lubricating gel with a format available for every procedure.

Key strengths

- Class IIa sterile medical device
- Water soluble and pH balanced
- Adheres well to gloves and instruments
- Available in sachet and tube format to suit clinician preference and procedure requirements

OptiLube is the gel of choice in **97%** of **UK acute hospitals** and is used in **over 60 countries** worldwide.

OptiLube sachets

3g e 5g e

OMS Code	HCPC Code	Product Description	Inner Pack	Outer Pack
1129US	A4332	OptiLube 3g sachet	Box of 144	Case of 1440
1129USB	A4332	OptiLube 3g sachet - Bulk	NA	Case of 1440
1120US	A4332	OptiLube 5g sachet	Box of 144	Case of 1440

OptiLube sachets promote advanced infection prevention procedures; the sterile single-use sachets reduces the risk of patient to patient contamination.

OptiLube tubes

2oz e 4oz e

OMS Code	HCPC Code	Product Description	Inner Pack	Outer Pack
1110US	A4402	OptiLube 2oz tube	Box of 12	Case of 72
1127US	A4402	OptiLube 4oz tube	Box of 12	Case of 72

OptiLube tubes have a unique flip-cap, enabling the tube to be opened easily and preventing unnecessary leakage.

“Choosing the **OptiLube** range has been a great decision for my practice and patients. The gel is high quality and consistently performs extremely well on all of the many procedures it is required for.”

Dr Donna Kershner, Doctor, York, UK

Single-use helps reduce infection, one sachet per patient

Easy tear

Pliable to prevent tube breakage. Volume allows appropriate extraction of required jelly

Large cap enables the tubes to be stored 'standing up' reducing storage space

“I can't thank **Optimum Medical** enough - **OptiLube** has changed my life.”

Desmond Birch, Patient, UK
